Environmental Training

Water Pollution Control Management (WPCM)

Course Description: This course will cover the Clean Water Act, the 2022 Construction General Permit, and ITD specifications, compliance resources, and ITD policies and procedures. It will also cover the management of projects day-to-day for compliance with environmental requirements and ITD policy and how to pass an EPA inspection.

Course Length: 16 hours over 2 days

Certification Period: This certificate of completion is valid for the duration of a Construction General Permit's cycle, up to 5 years.

Idaho Qualified Person (IQP) Course

Course Description: This self-paced online course is intended to ensure certificate holders meet the 2022 Idaho CGP definition of "Qualified Person". It will cover the specific training requirements for persons conducting SWPPP inspections.

The course covers all of the required topics including:

- Principles and practices of erosion and sediment control and pollution prevention practices at construction sites
- Proper installation and maintenance of erosion and sediment controls and pollution prevention practices used at construction sites
- Performance of inspections, including the proper completion of required reports and documentation.

This course is the only SWPPP inspector training that is Idaho specific. You'll learn the Idaho specific requirements of the 2022 Idaho CGP and the requirements of local agencies covered under Idaho DEQ MS4 permits.

Course Length: 3-4 hours

Certification Period: Upon passing the end of course test, students will earn a certificate valid for three years.
